CONTENTS VOLUME 25

Foreword ix
Committees x
Precious metals and Cenozoic volcanism in the Chilean Andes
J. Cabello (Santiago, Chile) 1
Biogeochemistry as an aid to exploration for gold, platinum and palladium in the northern forests of Saskatchewan, Canada
C.E. Dunn (Regina, Sask., Canada) 21
Soil geochemical and biogeochemical studies at the Borealis gold mine, Mineral County, Nevada, U.S.A. (extended abstract)
Chi-I Huang (Denver, Colo., U.S.A.) 41
The effect of transport and boiling on Ag/Au ratios in hydrothermal solutions: a preliminary assessment and possible implications for the formation of epithermal precious-metal ore deposits
D.R. Cole and S.E. Drummond (Oak Ridge, Tenn., U.S.A.) 45
Elemental dispersion associated with alteration and mineralization at the Hall (Nevada Moly) quartz monzonite-type porphyry molybdenum deposit, with a section on comparison of dispersion patterns with those from Climax-type deposits
S.A. Shaver (Stanford, Calif., U.S.A.) 81
Geochemical and fluid zonation in the skarn environment at the Tomboy-Minnie gold deposits, Lander County, Nevada
T.G. Theodore and S.S. Howe (Menlo Park, Calif., U.S.A.), D.W. Blake and P.R. Wotruba (Battle Mountain, Nev., U.S.A.) 99
Geology and interpretation of geochemistry at the Standard Mine, Humboldt County, Nevada
C.J. Ronkos (Reno, Nev., U.S.A.) 129
Background corrections to stream geochemical data using digitized drainage and geological maps: application to Selwyn Basin, Yukon and Northwest Territories
G.F. Bonham-Carter and W.D. Goodfellow (Ottawa, Ont., Canada) 139
Recognition of alteration in volcanic rocks using statistical analysis of lithogeochemical data
E.C. Grunsky (Toronto, Ont., Canada) 157
The Green Mountain massive sulphide deposit. Besshi-style mineralization within the California Foothills copper-zinc belt
P.R. Mattinen and G.H. Bennett (Sparks, Nev., U.S.A.) 185
Application of fluid inclusion and rock-gas analysis in mineral exploration
S.E. Kesler, P.S. Haynes, M.Z. Creech and J.A. Gorman (Ann Arbor, Mich., U.S.A.) 201
The use of lithogeochemical patterns in wall rock as a guide to exploration drilling at the Jason lead-zinc-silver-barium deposit, Yukon Territory
B.W. Smee and R.J. Bailes (Vancouver, B.C., Canada) 217

ABSTRACTS
Volcanic-hosted precious metals
Characteristics that distinguish types of epithermal deposits (D.O. Hayba, N.K. Foley, P. Heald-Wetlauder) 231
Fluid dynamics associated with the boiling zone in epithermal fissure veins, Topia, Durango, Mexico (R.R. Loucks) 231
The geochemistry of Majuba Hill, Nevada (K.J. Wenrich, J.F. Mascarenas and M.L. Silberman) 232

Mineralogy and geochemistry of hydrothermal alteration at Glass Buttes, south-central Oregon (M.L. Cummings and M.L. Johnson). 233
Precious-metal mineralization at the Zaca Mine, Alpine County, California (P. Merrick) 234
Preliminary geochemical data on the "Chlorite Breccia" of metamorphic core complex detachment zones and thoughts on associated (?) base and precious metal mineralization (W.A. Rehrig). 234

Applications of biogeochemistry to exploration for precious metals
Biogeochemical exploration for Cambrian-hosted gold deposits in the Homestake District, South Dakota, U.S.A. (W.C. Riese, R.B. Johnson and K.L. Howard) . 236

Theoretical aspects of gold/silver transport and deposition
Mechanisms of deposition of gold in low-temperature hydrothermal systems (S.B. Romberger) 237
Arsenic minerals as indicators of conditions of gold deposition in Carlin-type gold deposits (J.J. Rytuba) 237
Physical chemical processes affecting deposition of silica in Carlin-type gold deposits (F.W. Dickson and A.S. Radtke). 238
Ammonia alteration is a geochemical link in gold deposits of the Carlin-Midas Belt (E.I. Bloomstein) 239

Deposits in porphyry systems
The use of geochemistry in the search for molybdenum deposits (G. Westra) . . . 240
Trace elements in sphalerite, galena, and pyrite from molybdenum and non-molybdenum systems (R.C. Steininger) 240
Geochemical and geological exploration for gold-copper deposits in southern Luzon, The Philippines (L.P. James) 241

Advances in analytical geochemistry/data processing
Definition of multivariate geochemical associations with polymetallic mineral occurrences using a spatially dependent clustering technique and rasterized stream sediment data — an Alaskan example (S.K. Jenson and C.M. Trautwein) 242
The microcomputer in geochemical exploration (S.J. Hoffman and G.G. Mitchell) 242
Graphical and computer refinement of Cu-Mo-Pb-Zn-Ag anomalies, Crow Springs prospect, Esmeralda County, Nevada (C.W. Krumm and D.E. Pride) 243
Comparison of analysis techniques for gold (H. Blok, R.D. Morse and B.L. Twaites) 243
Integrative mercury gas geochemistry — a comparison with traditional mercury in soil geochemistry at the Cinola, B.C. gold deposit (J. Dunkhase). 244

Sediment-hosted precious metal deposits
Application of rank sum analysis to soil geochemistry at the Dee gold mine, Elko County, Nevada (W.C. Bagby, W.J. Pickthorn, R. Goldfarb and R.A. Hill) . . . 245
Geology of the Rain gold deposit, Elko County, Nevada (G.C. Knutsen) 245
Geology and geochemistry of the Quito prospect (R.N. Whittemore and R.S. Cowart) 245
Geochemistry and alteration studies at Carlin Gold's Maggie Creek deposit (C. Ekburg) 246
Micron gold-associated jasperoid: fluid inclusion chemistry and geothermometry (P.H. Schnorr, S.E. Kesler and P.L. Cloke) 247

Geothermal systems and ore deposits
Monotonic and prograding geothermal systems and precious metal mineral deposits (R.B. Blakestad and W.R. Stanley) 247

Geochemical patterns in an altered area at McGinness Hills, Lander County, Nevada (D.E. Wendell, R.J. Casaceli and W.D. Hoisington) 247
Epithermal gold-silver mineralization related to volcanic subsidence in the Custer Graben, Custer County, Idaho (K.M. Johnson and D.H. McIntyre) 247
Geology and ore deposits of the Thunder Mountain mining district, Valley County, Idaho (O. Adams) 248
An exploration strategy for hot-spring precious-metal deposits (B.R. Berger and S.S. Adams) 248
The formation of massive sulfide at 21° N, East Pacific Rise (R. Zierenberg) 250

General technical session
Relationship of the Cortez caldera to the Cortez disseminated gold deposit, Nevada (J.J. Rytuba, R.J. Madrid and E.H. McKee) 251
A stream sediment data base for the State of Colorado, U.S.A. (S.L. Bolivar) . . . 251
Gold occurrence at Island Copper mine, British Columbia (J.W. Gabelman and W.M. Hanusiak) 252
A hydride generator for the laboratory with a limited budget, and applications to selenium and arsenic determinations in geologic materials (F.N. Ward and D.L. Remington) 252
The relation between Tl, Rb and K in the Carlin-type gold deposits (M. Ikramuddin, L. Besse and P.M. Nordstrom) 253

Massive sulfide deposits
Alteration accompanying massive sulphide mineralization in the Delta district, east central Alaska: implications for exploration (C.R. Nauman and N.A. Duke) 254
The geochemical environment of Westmin Resources Buttle Lake mine, Vancouver Island, British Columbia (R.R. Walker) 254
Geology, lithologic association, and depositional environment of the Oposura massive sulfide deposit, Sonora, Mexico (C.D. Marrs) 255

Applications of hydrocarbons and vapor phase geochemistry
Alteration of organic matter around carbonate-hosted lead-zinc deposits (R.W. MacQueen) 256
Solution of structural problems in the Topia Ag-Au-Pb-Zn district, Durango, Mexico, using laser decrepitation and capacitance manometer gas analysis for fluid inclusion geobarometry (R.R. Loucks and M.A. Sommer II) 256
Factors affecting sulfur gas anomalies in overburden (M.D. Gardner, S.E. Kesler, M. Creech, P.L. Cloke and D. Stedman) 257
A new approach to multi-component gas geochemistry in metal exploration (R.W. Klusman, K.J. Voorhees, J.C. Hickey and D.N. Bloom) 258
Gas halos in hydrothermal clays associated with ore shoots at Creede, Colorado (P.H. Schnorr, J.A. Gorman and S.E. Kesler) 258

Primary dispersion of ore deposits
Primary gas dispersion halos in disseminated gold deposits: Examples from Nevada and California (C.G. Clifton) 259
Primary dispersion of trace elements, fluid inclusion zoning, and alteration zoning at the Pueblo Viejo Au-Ag deposit, Dominican Republic (K. McCurdy, N. Russell and S.E. Kesler) 259
Stream sediment geochemistry of the McLaughlin gold deposit and the Knoxville District, Napa and Yolo Counties, California (C.N. Upchurch) 260

Research Papers

The behaviour of uranium, thorium and tin during leaching from a coarse-grained porphyritic granite in an arid environment
C. Frick (Pretoria, South Africa) 261

Sulphide geochemistry and wall rock alteration as a guide to mineralization, Mammoth area, NW Queensland, Australia
K.M. Scott (North Ryde, N.S.W., Australia) 283

Groundwater helium surveys in mineral exploration in Australia
C.R.M. Butt and M.J. Gole (Wembley, W.A., Australia). 309

Base metals and mercury in bryophytes and stream sediments from a geochemical reconnaissance survey of Chandalar Quadrangle, Alaska
S.C. Smith (Reno, Nev., U.S.A.). 345

Emission spectrographic determination of volatile trace elements in geologic materials by a carrier distillation technique
H.N. Barton (Denver, Colo., U.S.A.) 367

Mercury, arsenic, antimony, bismuth and boron as geochemical indicators for geothermal areas
Zhu Bingqiu, Zhang Jinmao, Zhu Lixin and Zheng Yaxin (Beijing, P.R. China) 379

Electrochemical technique for exploration of base metal sulphides
A.K. Talapatra, R.C. Talukdar (Calcutta, India) and P.K. De (Bangalore, India) 389

Technical Note

A tubular-coring device for use in biogeochemical sampling of succulent and pulpy plants
W.L. Campbell (Denver, Colo., U.S.A.) 397

Book Reviews

Shallow Refraction Seismics, by B. Sjögren — R. Green 401

Geochemistry in Petroleum Exploration, by D.W. Waples — H. McCarthy. 402

Prospecting in Areas of Glaciated Terrain 1984, by the Institution of Mining and Metallurgy, London — K. Puustinen 403

Applied Environmental Geochemistry, by I. Thornton (Editor) — D.D. Runnels 404

Notice. 406
